**Dakine 2007 Gear**

Whether you're a Clueless valley girl or a hardcore skater punk, everyone loves to accessorize. **Since 1979, Dakine has been the king of surf, skate, snowboard and kiteboarding accessories.** Whether you need a new harness, some pads and straps or travel luggage and accessories, Dakine will have the perfect set up for you.

Having a comfortable harness and the right pads and straps can make or break a kiteboarding session. A pioneer in the industry, accessories by **Dakine are tried and true.**

**Pyro**

The **Pyro** is **Dakine's top of the line waist harness.** The Pyro is the original thermo molded kite harness featuring a unique elevation pattern which **enhances support, comfort and styling.** The 3-D molded shape ensures that the Pyro has the same shape on your first and one hundredth session. The Pyro offers double support with independent primary and secondary Power Belts, providing a secure fit and hold around your waist.

Pyro : Waist Harness

**Tabu**

The **Tabu** is Dakine's low profile waist harness, offering maximum support. The 8-point load dispersion system keeps the spreader bar down and evenly disperses power from the kite to the harness. Like all the Pyro, the Tabu incorporates independent Power Belts to keep the harness in one spot.

Tabu : Waist Harness

**Wahine**

Designed with a woman's figure in mind, the **Wahine** is the ultimate waist harness for female kites. The **anatomical 3-D shape** is cut to fit the curvaceous contours of a woman. Like all Dakine waist harness, the Wahine is equipped with independent primary and secondary Power Belts ensuring a snug fit around the waist.

Wahine : Waist Harness

**Fusion**

The **Fusion** is Dakine's best selling seat harness. The compression molded back panel combined with ultra comfortable leg straps provide the **ultimate combination of back support, mobility and comfort.** Independent Power Belts give the Fusion the security and hold of a waist harness with the feel of a seat harness. The Fusion allows for adjustable spreader bar height which makes this harness great for sharing!

**Tempest**

The **Tempest** is Dakine's girls specific seat harness. The Tempest offers a **lower profile fit and adjustable hook height.** These features along with a flattering panel layout provide the necessities for a girls' seat harness.

**Nitrous and Starlet Boardshort Harness**

### Dakine Seat Harnesses

Last year, Dakine introduced the first ever boardshort harnesses, the [Nitrous](#) and [Starlet](#), for men and women respectively. They are redesigned for 2007! These boardshort harnesses are fabricated with a lightweight, quick dry fabric that ensures your harness won't be wet for your next session. The internal leg straps are super comfortable. Like many of Dakine harnesses, the Nitrous and Starlet utilize the 8-point load dispersion system to centralize and direct the pull of your kite.

### Impact Vest

### Dakine Boardshort Harnesses

For 2007, Dakine has completely redesigned their [Impact Vest Harness](#). Dakine has thrown away the bulky, life jacket style paneling used in previous models and has introduced form fitting, flexible shaping panels. The **integrated life vest and waist harness provides ultimate combination of safety and comfort**. Utilizing the molded 3-D back piece used in the Pyro, the Impact Vest feels and pulls like a waist harness. Like the Pyro, the Impact Vest has independent primary and secondary Power Belts for securing and tightening the harness. The Dual Posi-Lock Buckle system ensures the spreader bar remains securing fastened and in one place.

### The Ultimate Pad and Strap Set-up

### New 2007 Impact Vest

The maker of the first ever, adjustable windsurfing foot strap, Dakine definitely has experience in making sure your feet are comfortably secured. For the Ultimate Pad and Strap Set-up try the [X-Lace Footstraps](#) with the [Boost II Deck Pads](#) and Raptor Heel Straps. The X-Lace Footstraps are Dakine's premier kiteboarding footstrap, offering **on-the-fly, micro adjustability**. Whether sharing your board or taking off your booties, the easily accessible pull-tab adjustment system works equally well on the water or on dry land. The Boost II Deck pads are molded fabricated with a molded, shock absorbing compound. The uni-directional traction pattern **keeps your feet in the straps while cushioning hard landings**. The pad also offers superior arch support, facilitating good posture and stance while riding. The final pieces to this complete set up are the Raptor Heel Straps. These light weight, padded straps are designed to provide the **perfect amount of tension to keep your feet where they belong**. Different attachment points allow them to fit on all sizes of feet. Their mold shape ensures that they retain their shape when not in use. Keep your feet securing fastened to your board with this awesome set up.

### Slider Bag

The Dakine [Slider Bag](#) is the perfect way to keep your board protected and your car **sand free**. The padded walls offer maximum gear protection and the webbed carrying handle provides comfort while carrying. The Slider Bag comes in 135 cm and 155 cm. If you're putting a shorter board in the larger bag, there's usually enough room for a harness and your riding cloths!

### The ultimate in pads and straps

### BTS Split Bag

Tired of having to pay luggage charges for overweight kite bags? The [BTS Split Bag](#) is your travel solution. This 140 cm long bag **converts to two separate bags**, each padded to protect your gear. Exterior I.D. pockets on each bag allow you to identify each piece as yours. Heavy duty urethane wheels and bag straps allow you to navigate the corridors of the airport and the subway with ease.

### Air Wagon

The [Air Wagon](#) is the ultimate kite travel bag. The split level design allows access into multiple compartments. This **gigantic bag is designed to hold multiple boards, kites and other pieces of gear**. With a heavy-duty handle on each end and urethane wheels, this bags travels in a breeze. Each side padding with 3/8" of foam, your gear will stay protected and ding free. The Air Wagon comes in two sizes, 135 cm and 160 cm.

BTS Split Bag

### Daylight Surf Bag

The [Daylight Surf Bag](#) is the perfect protection when strapping your board to the top of your car or the side of your boat. The **heat and water resistant tarpaulin material** with thick foam padding makes this an unbeatable day bag. Noserider style day bags offer fish hook zip design and a fin slot. The thrusters provide wrap around zippers. The padded shoulder strap and webbed carrying handle makes this a great solution to carrying your board to the beach. Bags range from 6'0" to 12'0".

Air Wagon

### Traction Pads

REAL is stoked to offer the best Dakine [Traction Pads](#). Currently stocked with the [Andy Pro](#), [Bobby Pro](#), [Bruce Pro](#), [John John Pro](#), [Mantis](#) and [Flat Deck](#) Pads, there is definitely a traction pad to fit your riding style. All pads offer a tail kick for foot support. As Dakine likes to say, it's all about the compound. **Dakine Posi Traction stays sticky and grippy in icy water and won't rub your knees raw in warm tropical water.** Their specially formulated EVA foam retains its specific density and 100% memory in any water temperature. Dakine uses the best 3M PSA (Pressure Sensitive Adhesive) to insure your pads will never peel off until you take it off.
